

Is Your Warehouse Firesafe?

A lot more people have been killed in warehouse fires than before.
Check the following NOW. Prevent fires. Protect lives and property!

QUESTION 1 Do you keep fire protection systems (ex., fire shutters) in the right condition?

1

Cardboard boxes accidentally blocking fire shutters or other fire protection systems may let fires spread.

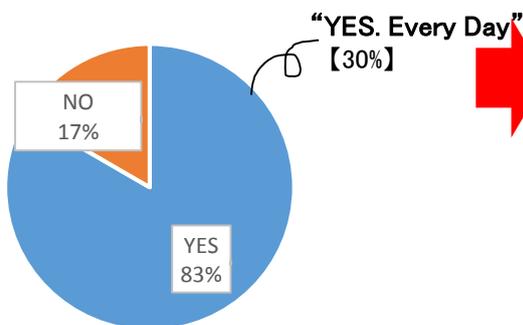

Fig. 1 Safety Checking On Your Own (for blocking)

- ★ Prepare the warehouse safety checklist. Check your place every day.
- ★ Don't leave anything on the evacuation route.
- ★ Have the warden for fire protection systems.
- ★ Give fire safety lecture sessions.

【Example】
“How To Handle A Fire Shutter”
(How to handle a manually-operated system)

Your missions...
Keep fire safety!
Know ways out!

QUESTION 2 Do you give fire and emergency drills?

2

Use fire protection systems properly, or you may have a fire spreading and causing serious damage in a warehouse.

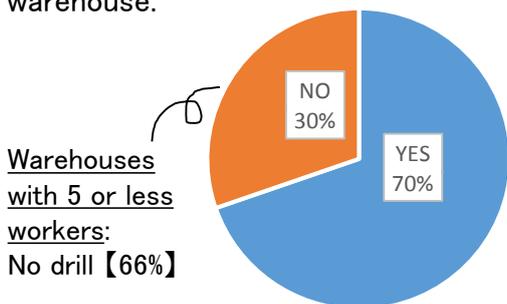

Fig. 2 Fire & Emergency Drills

- ★ **Initial Firefighting Drill**
Learn how to use extinguishers and wall/outdoor hydrants. Prepare for fires. ⇒ P. T. O. (for handling.)
- ★ **Evacuation Drill**
Fire shutters work in case of a fire. So, try the sideway door and know the way out.
- ★ **Emergency Call Drill**
Your warehouse information beside the phone helps you report an emergency quickly.

CHECK!

Fire Safety Check Sheet
