### *The TFD Welcomed and Helped Trainees Step Up Rescue Skills*

The TFD started up the Rescue Techniques Training Course 2019 on October 21 at the Fire Academy.

Five delegates from the Taipei City Fire Department of Taiwan attended this 10-day training program. Various rescue skills and methods were handed down to the five trainees by the three TFD instructors from the Fire Rescue Task Forces (of the 8<sup>th</sup> Fire District HQ).

The five members, now back at home after completing the training course, will take the lead as trainers in the Taipei City Fire Department in March 2020. TFD members will be there, helping the new leaders make the training a huge success.
