

# MESSAGE FROM KOJIMACHI FIRE STATION

*Protect Tokyo!!*

## TFD Comprehensive Earthquake Drill 2017

We will conduct the TFD comprehensive earthquake drill in the I-GARDEN AIR area!

I-Garden Air (Iidabashi 3-13, Chiyoda-ku)

Under the scenario of a big Tokyo earthquake, TFD emergency responders will cope with building collapse, railroad accidents, fires, etc. You will see them doing disaster scene fact-finding with a drone system, using rescue helicopters and fireboats, showing their professionalism as Fire Rescue Task Forces members, etc. The images of the destruction inside buildings will be demonstrated by the projection mapping of the LIGHTMAN (*i.e.*, the club founded by Waseda University graduates). “The injured” will be the 200 students from the Tokyo Shinjuku Medical Center Affiliated Nursing School and Teikyo University. In addition, Tokyo Visual Arts students will reproduce the state of injuries. All these people will surely add “reality” to this large scale emergency drill!!

For First Aid & Command

Rescue Helicopter

Drone

Evacuation

I-GARDEN AIR

Rescue

Fireboat

Special Apparatus
